

**The European Commission's Joint Research Centre
organizes the workshop about the European Pilot Project
**Integrated techniques for the seismic strengthening and
energy efficiency of existing buildings****

16-19 November 2020

The Pilot Project aims to define solutions that can both reduce seismic vulnerability and increase energy efficiency of existing buildings, thereby increasing their resilience to natural hazards and climate change while limiting their impact on the environment.

The workshop aims to serve as a platform to create awareness of the issue's challenges and opportunities, develop a network for information sharing among stakeholders, gather insight to guide future project actions, and inform participants about the purpose and potential of the project

You may find more information about the Pilot Project in the attached leaflet.

Please register [here](#).

Registered participants will receive the digital platform details closer to the date of the event.

Please feel free to share the information across your networks.

We look forward to seeing you at the workshop.
